

backend . internal . scubic

namespace

service environment domain

The diagram illustrates the components of the domain name 'backend.internal.scubic'. The name is written in a large, black, monospaced font. Below it, three curly braces are positioned under the words 'backend', 'internal', and 'scubic' respectively. Underneath each brace is a label: 'service' for 'backend', 'environment' for 'internal', and 'domain' for 'scubic'. A fourth, larger curly brace is placed above the words 'internal' and 'scubic', with the label 'namespace' centered above it, indicating that these two parts together form a namespace.
